PROFILE SUMMARY

Results-driven React developer with 1.9 years of experience. Proficient in React, JavaScript, Node.js, HTML, and CSS. Skilled in building scalable and responsive web applications. Passionate about creating elegant and efficient solutions using the latest technologies. Overall, my goal is to contribute to the success of projects by leveraging my technical skills and problem-solving abilities to develop robust and user-friendly applications.

EDUCATION

Ram Manohar Lohia Avadh University   2015 – 2018
Bachelor of Arts   *Uttar-pradesh, Lucknow*

EXPERIENCE

CLOUDSUFI   November 2021 – October 2023
Full Stack Developer   *Noida, Uttar Pradesh*

- Worked as a frontend developer, contributing to the development of web applications.
- Was Responsible for creating UI components using the Material UI library, utilizing the Context API for state management, and implementing forms using React Hook Form.
- Was worked in the Electronic Medication Administration Records (EMar) feature, specifically managing the medicine counter. Additionally, I handled bug fixing and troubleshooting to ensure the smooth operation of the applications.
- Managed UI development and seamlessly integrated it with the API in a GenAI project.
- Worked on Node.js , contributing to the development of RESTful APIs and integrated them with the frontend components.
- Employed JavaScript, and Node.js to create efficient and maintainable backend solutions.
- Designed and developed an inventory management system for efficient stock tracking and management.

PROJECTS

Placement Cell | Github-Frontend | Github-Backend | *Html, Css, Javascript, Node.js, Express.js, MongoDB*   **March 2023**

- Developed a robust placement system to manage the student's placement details and Company registration.
- Integrated with functionalities such as scheduling interviews and providing the results of each interviews.
- Integrated MongoDB to store and manage user data and company details efficiently.
- Ability to download students scheduled interview data in the form of CSV.

Hospital API | Github-Backend | *Node.js, Express.js, MongoDB*   **April 2023**

- Designed and implemented a RESTful API for a hospital to manage Doctors and patients data using Node.js and MongoDB. The API allows signup as a doctor, adding patients and their details.
- Developed API endpoints for creating Patient profile and reports
- Implemented a well-organized folder structure for controllers, and routes, ensuring maintainability and scalability.
- Utilized MongoDB for database storage, incorporating Mongoose for seamless data interaction.

Secure Auth | Github-Frontend | Github-Backend | View | *React.js,* Node.js, Express.js, MongoDB, Mongoose   **June 2024**

- Designed and implemented a Secure Auth application for Authenticating User , Signing up and signing In user and storing secure passwords.
- The Application Stores users data, username, email and hashed password into MongoDB database.
- Validates user data for duplicate username and email and validate password.
- Authenticate the user at the time of Signin.
- The Application uses React-Router-Dom for routing.

TECHNICAL SKILLS

Programming Languages: Javascript, Java, HTML, CSS
Databases: MongoDB, Firebase
Libraries/Frameworks: React.js, Node.js, Express, Mongoose
Additional Skills: Redux, Context API

TRAININGS

Coding Ninjas   **Aug 2023 – July 2024**

Full Stack Web Development

  • **Backend** | **Frontend** | **Java** | **Data Structure**

CETPA   **Apr 2021 – Oct 2021**

Full Stack Web Development

ACHIEVEMENTS

  • Awarded Certificate of Appreciation for Exemplary Teamwork, Saving Team's efforts and Time

  • Awarded Certificate of Appreciation for Exemplary Teamwork, Commitment and Dedication
